

The image shows a 10x10 grid of binary patterns. Each cell in the grid contains either a black or white square. The patterns are arranged in a repeating sequence of four rows. The first two rows consist of a black square followed by eight white squares. The third row consists of a white square followed by nine black squares. The fourth row consists of a black square followed by seven white squares. This pattern repeats across all 100 cells of the grid.
