- ا امام علی (ع): شرافت به خرد و ادب است نه به دارایی و نژاد. 1. A computer cannot do anything unless a person tells it what to do and gives it the appropriate information; but because electric pulses can move at the speed of light, a computer can carry out vast numbers of arithmetic-logical operations almost a. circuitously b. ultimately c. ambiguously d. instantaneously 2. The following words and/or constructions are used to show non-equivalence. unequal (ly) not as ... as greater than word + er than unlike not as many ... as more ... than neither ... nor ... as not the same as fewer ... than not as much ... as not all In which statement, the above words and/or constructions are used incorrectly? a. Learning a computer language is **not as** difficult **as** it seems. b. More minicomputers than microcomputers could be as complex as large mainframes. c. Twenty years ago, there were **fewer** computers in use **than** today. d. A mainframe is **bigger** and **more** expensive than a microcomputer 3. In which set of two words, the second word is the antonyms of the first one? a. react – reply b. take away -- bring c. tremendous -- marvellous
- d. react -- respond 4. The improvements of computers are reducing man's workload.
- a .Technology b. Technologist c. Technological d. Technologically
- 5. The gap of which statement is completed using prefix **inter**.
- a.byte means one million bytes.
- b.plexing is when many electrical signals are combined and carried on only one optical link.
- c. Blocks are separated from each other by marks calledblock gaps.
- d. CRT terminals are very usefulactive devices for use in airline reservations.

- 6. Which set of words complete the gaps of the following statement:
 - (i)integration
- (ii)integrated
- (iii) integrate

- (iv)integrating
- 1. Some computer manufacturers have both input and output devices into one terminal.
- 2. The success of any computer system depends on the.....all its parts to form a useful whole
- 3. input and output devices into one peripheral has reduced the area needed for a computer installation.
- a. $1 \leftarrow (i), 2 \leftarrow (iii), 3 \leftarrow (iv)$
- b. $1 \leftarrow (iii)$, $2 \leftarrow (ii)$, $3 \leftarrow (iv)$
- $c.1 \leftarrow (ii), 2 \leftarrow (i), 3 \leftarrow (iv)$
- d. $1 \leftarrow (iv)$, $2 \leftarrow (i)$, $3 \leftarrow (iv)$
- 7. Which of the following statements is true?
 - a. Desktop organizers are programs that require desktop computers.
 - b. Not only is computing equipment getting smaller, it is getting more sophisticated.
 - c. The use of computers prevents people from being creative.
 - d. Computer users do not have much influence over the way that computing develops.
- 8. The term "Expert System "means:
 - a. Software that enables computers to 'think' like experts
 - b. Use computers to stay in touch with the office while working at home
- c. Internet system designed to provide free, interactive access to vast resources for people all over the world.
 - d. A combination of text with sound, video, animation and graphics
- 9. Clustering divides data into groups based on
 - a. similar feasures or limited data ranges.
 - b. size of data.
 - c. size of decision trees.
 - d . type of data.

17. Which of the following terms is defined by the statement:

"A device for connecting dissimilar networks"

a. Internet address

b. User Datagram Protocol

c. Resolution protocol

d. Gateway

18. The term "IMAP" means:

a. An email transfer process in which the connection is initiated by the sending computer rather than the receiving computer.

- b. A mail transfer protocol that initially only retrieves the message headers.
- c. An email transfer process in which the receiving computer initiates the connection.
- d. A message protocol that downloads all email messages at the same time.
- 19. Which of the following statements is <u>false</u>?
 - a. SGML is more complex than XML.
 - b. XML files can only be read by browser programs.
 - c. HTML is a markup language.
 - d. XML files can only be used on Unix systems.
- 20. The phrase "HTML" means:
 - a. A language from which you can create other languages
 - b. Data about data
 - c. An example of a page presentation Language
 - d. Extensible markup language
- 21. In which set of two words, the second word is the antonym of the first one?

a. Cruelty -- Abuse

b. Endure -- Persevere

c. Agile -- Limber

d. feasible -- Unachievable

22. Which of the following terms is defined by the statement.

"Person pretending to be someone else"

- a. Impostor
- b. Tenets
- c. Tamper

d. Decipher

- 23. The blank of which following statements is completed with the phrasal verb "break into"?
 - a. Some hackers..... systems to get commercially valuable information.
 - b. When you to a network, you have to provide an ID.
 - c. How do you hacking into a system?
 - d. Hackers may pretending to be from your company and ask for your password.
- 24. Many industry observers feel that the encapsulation features of is the natural tool for complex applications in which speech and moving images are integrated with text and graphics.
 - a. OUP b. OOP
 - c. MCP d. MCSE
- 25. The term" Encapsulation" mean:
 - a. A list of choices
 - b. A re0usable collection of objects
 - c. Object-oriented programing
 - d. An OOP property that allows data and program instructions to be bundled into an object.
- 26. Which of the following statements is <u>false</u>?
 - a. You can decide on the suitability of a course by its title.
 - b. Practice exams allow you to become familiar with the structure of the exams.
 - c. It is your responsibility to make sure that your certification is kept up to date.
 - d. Gaining a certificate is likely to make you more attractive to other employers.
- 27. The term "Intelligent agent" means:
 - a. Most powerful type of computer.
 - b. A computer program that watches, (earns and communicates with the user)
 - c. Research and development.
 - d. Transfer data from a client device to a server computer.

28. Which set of linking words and phrases, complete the gaps of the following text:

- (i)Although
- (ii)Because
- such as (iii)
- therefore(iv)

The user is aware of the effects of different applications programs(1).... operating systems are invisible to most users. They lie between applications programs, ...(2).... word-processing and the hardware. The supervisor program is the most important. It remains in memory(3).... it is referred to as resident. Others are called non-resident(4).... they are loaded into memory only when needed.

- a. $1 \leftarrow (i)$, $2 \leftarrow (iii)$, $3 \leftarrow (iv)$, $4 \leftarrow (ii)$
- b. $1 \leftarrow (iii)$, $2 \leftarrow (ii)$, $3 \leftarrow (iv)$, $4 \leftarrow (i)$
- c. $1 \leftarrow (ii)$, $2 \leftarrow (iii)$, $3 \leftarrow (iv)$, $4 \leftarrow (i)$
- d. $1 \leftarrow (iv)$, $2 \leftarrow (i)$, $3 \leftarrow (iv)$, $4 \leftarrow (ii)$
- 29. The price of a computer is now
 - a. rising
 - b. too high for most schools
 - c. affordable for most school
 - d. preventing schools from buying computers
- 30. Manufacturers are <u>donating</u> computers to schools.
 - a. going

b. deducting

c. giving

d. dedicating

سئوالات تشريحي

1. Match the items in Table \underline{A} with the statements in Table \underline{B} . (\cdot /4 mark)

a. ISDN	i. Digital channel used to carry ISDN
b. Data channel	signaling and supervisory information to the
c. Bearer channel	network
d. DSL	ii. Device installed on a PC to allow it to
e. Splitter-based services	receive ISDN signals
f. ADSL	iii. Integrated Services Digital Network
	iv. Asymmetric Digital Subscriber Line
	v. Digital channel used to carry ISDN data
	vi. Digital Subscriber Line

Table B

2. Fill in the blanks with the correct prefix from the following list. (\/omark)

multi-	deci-	sub-	inter-
semi-	mono-	mega-	auto
mini-	de-	inter-	prim-

- 1.byte means one million bytes.
- 2.plexing is when many electrical signals are combined and carried on only one optical link.
- 3. Blocks are separated from each other by marks calledblock gaps.
- 4. The number system we use in everyday life is themal system which has a base of 10.
- 5. CRT terminals are very usefulactive devices for use in airline reservations.
- 6. Some screens arechromatic whereas others produce multicolor pictorial graphics.
