Virtually every major research library in the world provides access to the ProQuest Dissertations & Theses (PQDT) database through one or another format. Your library is sure to have at least one of these products.

Links jump down to topics below

-------------- Select ----------------------- ▾

ProQuest Dissertations & Theses Database (PQDT)

With more than 2.3 million entries, the ProQuest Dissertations & Theses (PQDT) database is the most comprehensive collection of dissertations and theses in the world. Graduate students customarily consult the database to make sure their proposed thesis or dissertation topics have not already been written about. Students, faculty, and other researchers search it for titles related to their scholarly interests. Of the millions of graduate works listed, we offer over 1.9 million in full text format. PQDT is a subscription database, so consult your library for availability.

Dissertation Express

Place an Order
To order a copy of **your author dissertation**, please send an email to: disspub@proquest.com

To order **a copy of a dissertation** by fax or mail, download and complete the dissertation order form.

Use our **online ordering system**, *Dissertation Express to place your order immediately.
* Note: Only PDF files or unbound print copies can be ordered onlir

Search Instructions

The fastest way to identify and validate a dissertation is to enter the last seven characters of the UMI order number. If you don't have this, enter a word or phrase into the search terms field or the author's last name and the first four words of the dissertation title.

Search terms - Enter a word or phrase related to the dissertation. Use "quotation marks" to search for exact phrases.

Order Number - Enter the last seven characters of the UMI order number. (Example: for citation DA9412718, you should enter "9412718")

Author - Enter the author's last name or the author's last name, first name. (Examples: "Smith" or "Smith, Jane")

Title - There's no need to enter the entire title. Usually, the first four or five words will be sufficient to identify the dissertation.

Choosing a Format

You may choose from either unbound, shrink-wrapped print copies or PDF files.

What is OpenThesis?

OpenThesis is a free repository of theses, dissertations, and other academic documents, coupled with powerful search, organization, and collaboration tools.

We hope that you will take a moment to upload your theses, dissertations and other publications -- and ask your colleagues to do the same. The more comprehensive our database is, the more useful it is to everyone!

Can't find the thesis you want? Click here to ask our experts

Service update:
Theses not available for immediate download are currently taking the British Library 30 working days to digitise, once they have been received from the relevant institution. Due to fluctuations in demand this time scale may be subject to change.

OhioLINK ETD Center

Worldwide ETD Index

Find [   ] in [any field   ▾] [Search]

    any field
    title
Results per page: [30 ▾]   author name
    abstract
    subjects/keywords
    school/publisher

This is a global index of freely available electronic theses and dissertations, provided by major ETD collections around the world. This index lets you search for information about each ETD ("metadata," including authors, titles, and abstracts). It does not search the full text of the ETDs.

Other thesis and dissertation searches:

- OhioLINK ETDs
- A larger worldwide collection of ETDs harvested by OCLC and provided by VTLS. Not all of these ETDs are freely available online.
- Proquest Dissertations and Theses, a database of 2.4 million theses and dissertations, both electronic and print, from UMI/Proquest. Access may be restricted based on your network connection; see your library's web pages for access information. Off-campus OhioLINK users should use our database lists.

Information in this database is provided by participating institutions. OhioLINK cannot guarantee the accuracy or completeness of records from other ETD sites. Please report any problems or broken links to the host site.

Finding Dissertations

Using ProQuest Dissertations & Theses database to find PhD dissertations

ProQuest Dissertations & Theses database contains records for PhD dissertations from 1861 through the present, and it allows you to search via keyword, date or institution. This is often the fastest way to find electronic versions of Cornell dissertations.

There are two ways to find Cornell dissertations. You can search Dissertations & Theses @ Cornell University and the Weill Medical College, a subset of ProQuest Dissertations & Theses, or go to ProQuest Dissertations & Theses and choose the Advanced Search. In a search box, type "Cornell"; from the adjacent drop-down menu, select School name/code and enter your search terms in the remaining search boxes to target your search. From the results, you can use citations to search the Cornell Library catalog for individual titles. In some cases, results will have the full-text of the dissertation and/or links to purchase the dissertation.

Using the Library Catalog to find theses and dissertations at Cornell

Using the Advanced Search option, enter your search terms and limit the **Library** to "Cornell University Library" and the **Content** type by "Thesis/dissertation."
